Traditional Tickets Timeline

Traditional Tickets will eventually be phased out, with \$1 to \$5 being the first to go. As the number of Traditional Tickets reduces, inventory management and reconciliation will become more straightforward. Ultimately, with 100% Activation Tickets in the market, Retailers will fully benefit from ticket activation processes.

From now on, all new ticket releases will be Activation Tickets!

Traditional Tickets – Phasing Out

Traditional Tickets Timeline

Questions & Answers

Why are some Traditional Tickets remaining available for so long?

Some of the **One-Off Tickets** that are in the market for longer are tickets that are launched in collaboration with other lotteries across Canada. These tickets are designed to be in market for 1-2 years in order to have the print quantity required to support larger prizes and prize pools.

Some of the **Base Games** are also available longer due to printing multiple variations at the same time, or due to printing a larger number of tickets in each print run. By being more efficient with the printing, this ensures sustained inventory of popular games that many players enjoy playing regularly.

How will Traditional Tickets become unavailable?

Traditional Tickets may become unavailable for ordering due to several reasons:

- Firstly, if a game sells out of BCLC warehouse, it will no longer be available.
- Additionally, BCLC establishes stop sell dates for all tickets. If a game doesn't sell out, the stop sell date renders the ticket unavailable for ordering.
- Furthermore, the upcoming September Buyback Campaign will provide an opportunity to return approved-for-buyback tickets and soon-to-expire tickets, all of which are Traditional Tickets.
