## Live Betting in Retail – January 30, 2026

### What is Live Betting?

Live Betting – also called in-play betting, is wagering on a sporting event after it has already started, with odds that continuously update as the event is in play.

Unlike traditional pre-game bets, Live Betting starts once the event has started and wagers can be placed at any point during the game.

Live Betting odds update continuously to reflect what is happening in the game in real time.

### Live Betting tickets **CANNOT** be cancelled once printed

Due to the real-time nature of Live Betting, odds and outcomes are continuously updated as events unfold. To maintain fairness and integrity for all players, cancellation or voiding of tickets is not permitted after purchase.

If you attempt to cancel a Live Betting ticket, an error message will appear on the Lottery Terminal, indicating the action is not allowed.

Live Betting wagers are not eligible for cancellation.

## Suspended Live Betting Tickets

Live Betting may occasionally be suspended. This occurs when a significant in-game event takes place that could substantially impact the odds. When a Live Betting selection is suspended, wagering is temporarily halted – players cannot place new bets or adjust existing wagers until the market reopens.

If a player's QR Code is scanned during a suspension, an error message will appear on the Lottery Terminal to indicate that Live Betting selection is temporarily unavailable.
